

**20<sup>th</sup> Annual General Meeting of the Singapore Business Federation  
Thursday, 23 June 2022, 2.30pm**

**Questions Received and Responses**

**Question:**

How can SBF help startup A.I. companies?

**Response:**

Startup companies looking to internationalise can leverage on the GlobalConnect@SBF programme, an initiative by SBF and supported by Enterprise SG to help Singapore businesses expand and deepen their presence in overseas markets, as well as participate in international overseas trade fairs organised by SBF.

Other areas of assistance by SBF includes supporting businesses in talent development, upskilling of their workforce and management of manpower challenges, through the SBF Business Institute and programmes like the Career Conversion Programme for Internationalisation Professionals (CCP-I).

SBF also organises various events and activities to facilitate networking, business match-making and collaboration, in line with our role as bridge, facilitator and enabler. In this regard, partnerships will be a key ingredient in our strategy, and we look forward to building on our position as a trusted apex chamber to bring together companies, TACs, and other stakeholders to work together to surface new ideas and tap new opportunities.

Members are welcome to reach out to us to learn more about our services and initiatives.
